Oma Edith ist zu Besuch um ihren Mio  
endlich in die Arme zu schließen

**The FranklinGothic problem:** The CEWE FG fonts are (a) badly formed (all of them have the same full font name) and (b) CEWE does not supply an FG italic font! This resulted in our generated pdf inexplicably using FG bold italic where it should have used FG bold. I suspect an issue in the reportlabs font management. The "fix" is some improvement of loading of the fonts in our code (including better diagnostics) and to define the FranklinGothic font family by hand in cewe2pdf.ini, using the Windows FG italic font to take the place of the missing CEWE FG italic. But don't ask me why that fixes it. <https://github.com/bash0/cewe2pdf/issues/128>

FG Normal	Arial
FG Bold	<b>Arial Bold</b>
<i>FG Italic</i>	<i>Arial Italic</i>
<b><i>FG Bold Italic</i></b>	<b><i>Arial Bold Italic</i></b>
<b>BALLOON CAPS</b>	
<i>Harlow Solid Italic</i>	

The whole issue of "incomplete" font families is not clear. CEWE manages a full set of four from the single pecita.ttf font file, as shown below, while our code needs separate files for the four weights!

Pecita Book  
Pecita Book Bold  
Pecita Book Italic  
Pecita Book Bold Italic

This is on page 26.

This is the last page that can be used.
